

AWARENESS IS ONE OF OUR PILLARS. WE INSPIRE, COMMUNICATE AND TRAIN YOU TO ACT SUSTAINABLY.

Bosch aims to raise awareness among new practitioners entering the company. Within the Integration Program, a space was created to share our sustainable story, show the results of actions and encourage them to think sustainably.

THE JOURNEY OF THE INTERNSHIP IS DIVIDED INTO 2 STAGES:

1

Presentation of the main initiatives and results of Bosch as a sustainable company, as well as awareness of the subject.

2

It's time to practice! Guided tour of the Campinas factory to follow the production process of sustainable tools and packaging.

Work #LikeABosch

POWER STAGS

JORNADA DE INTEGRAÇÃO E CAPACITAÇÃO

Belong Learning

- 1 É o momento de conhecer outros estapas, pilares do BOSCH. Integre-se ao estágio e troque muita experiência! [Nos encontramos em Trade, no ponto eletrônico do produto 401](#)
- 2 Próxima parada: fábrica CaPI. Uma visita guiada para aprender nosso processo de produção e novas tecnologias.
- 3 Sustentabilidade! Você vai entender como ocorre as nossas iniciativas sustentáveis e como você pode fazer parte disso!

Salve o convite na sua agenda e #vemprabosch se capacitar com a gente!

INTERNAL SELECTIVE COLLECTION

In addition to all actions, **Bosch** internally encourages employees to create a collective awareness when the topic is sustainable disposal and recycling.

At all **Bosch** plants: entrances, buildings, restaurant, factory - selective collection containers are distributed for the correct disposal of food, materials and batteries. This action makes a difference for the recycling and sustainability of the planet.

AWARDS

Bosch's sustainable actions brought good results!
Check out the internal awards we've won and see our trophies
on the shelf

To further help with awareness, **Bosch** created the Sustain meter, a dashboard that measures the positive impact of our actions.

PT SUSTAIN METER

56%

of the total plastic used in the production of tools in Campinas comes from recycled raw materials, and the rest is recyclable.

We avoid emitting

1.615

TONS OF CO2 into nature.

THE REDUCTION OF CO2 EMISSIONS UNTIL OCTOBER 22 IS EQUIVALENT TO:

Monthly consumption of **46 thousand houses**

soccer fields with **150,000 trees planted**

88 million 500ml bottles of water

Enough water to supply **127 thousand houses** with 3 inhabitants

Less than a **thousand cars** polluting the streets
